

Greetings,

There needs to be an open discussion about a rule change with such far reaching consequences and effect upon our democratic society. If the proposed change is more than just a power grab by large corporations and politicians, then there is plenty of time for an open, honest discussion of what the changes mean and how it is beneficial to the citizens of our country.

Please postpone your decision in this matter until the democratic processes of this great country give people a fair chance to have their opinions heard.

Sincerely,  
S St John
